NATIONAL LEVEL		
1. General information		
1.1 Member State	ни	
1.2 Species code	1188	
1.3 Species scientific name	Bombina bombina	
1.4 Alternative species scientific name		
1.5 Common name (in national language)	vöröshasú unka	
2.04		

### 2. Maps

2.1 Sensitive species	No
2.2 Year or period	2013-2018
2.3 Distribution map	Yes
2.4 Distribution map Method used	Based mainly on extrapolation from a limited amount of data
2.5 Additional maps	No

# 3. Information related to Annex V Species (Art. 14)

b) temporary or local prohibition of the taking of specimens in the wild and exploitation c) regulation of the periods and/or methods of taking specimens d) application of hunting and fishing rules which take account of the conservation of such populations	3.1 Is the species taken in the wild/exploited?	No	
d) application of hunting and fishing rules which take account of the conservation of such populations		b) temporary or local prohibition of the taking of	No No
account of the conservation of such populations		c) regulation of the periods and/or methods of taking	No
e) establishment of a system of licences for taking No			No
		e) establishment of a system of licences for taking	No

specimens

d) application of hunting and fishing rules which take account of the conservation of such populations
e) establishment of a system of licences for taking specimens or of quotas
f) regulation of the purchase, sale, offering for sale, keeping for sale or transport for sale of specimens
g) breeding in captivity of animal species as well as artificial propagation of plant species
h) other measures

No

2019.11.26. 10:22:43 Page 1 of 6

3.3 Hunting bag or quantity taken in the wild for Mammals and Acipenseridae (Fish)

#### a) Unit

b) Statistics/ quantity taken	Provide statistics/quantity per hunting season or per year (where season is not used) over the reporting period					
	Season/ year 1	Season/ year 2	Season/ year 3	Season/ year 4	Season/ year 5	Season/ year 6
Min. (raw, ie. not rounded)						
Max. (raw, ie. not rounded)						
Unknown	No	No	No	No	No	No

3.4. Hunting bag or quantity taken in the wild Method used

3.5. Additional information

#### **BIOGEOGRAPHICAL LEVEL**

### 4. Biogeographical and marine regions

4.1 Biogeographical or marine region where the species occurs

4.2 Sources of information

#### Pannonian (PAN)

### 5. Range

2019.11.26. 10:22:43 Page 2 of 6

ii, iv alia v species (Ali	ilex bj	
5.1 Surface area	93000	
5.2 Short-term trend Period	2007-2018	
5.3 Short-term trend Direction	Stable (0)	
5.4 Short-term trend Magnitude	a) Minimum	b) Maximum
5.5 Short-term trend Method used	Based mainly on ex	xtrapolation from a limited amount of data
5.6 Long-term trend Period		
5.7 Long-term trend Direction		
5.8 Long-term trend Magnitude	a) Minimum	b) Maximum
5.9 Long-term trend Method used		
5.10 Favourable reference range	a) Area (km²)	
	b) Operator	Approximately equal to (≈)
	c) Unknown	
	d) Method	
5.11 Change and reason for change	Improved knowled	ge/more accurate data
in surface area of range	The change is mair	lly due to: Improved knowledge/more accurate data
5.12 Additional information		

#### 6 Donulation

6. Population		
6.1 Year or period	2013-2018	
6.2 Population size (in reporting unit)	<ul><li>a) Unit</li><li>b) Minimum</li><li>c) Maximum</li><li>d) Best single value</li></ul>	number of map 1x1 km grid cells (grids1x1) 2789
6.3 Type of estimate	Best estimate	
6.4 Additional population size (using population unit other than reporting unit)	<ul><li>a) Unit</li><li>b) Minimum</li><li>c) Maximum</li><li>d) Best single value</li></ul>	
6.5 Type of estimate		
6.6 Population size Method used	Based mainly on ext	rapolation from a limited amount of data
6.7 Short-term trend Period	2007-2018	
6.8 Short-term trend Direction	Stable (0)	
6.9 Short-term trend Magnitude	a) Minimum b) Maximum c) Confidence interv	al
6.10 Short-term trend Method used	Based mainly on ext	rapolation from a limited amount of data
6.11 Long-term trend Period		
6.12 Long-term trend Direction		

2019.11.26. 10:22:43 Page 3 of 6

6.13 Long-term trend Magnitude

- a) Minimum
- b) Maximum
- c) Confidence interval

6.14 Long-term trend Method used

6.15 Favourable reference population (using the unit in 6.2 or 6.4)

- a) Population size
- b) Operator

Approximately equal to (≈)

- c) Unknown
- d) Method

6.16 Change and reason for change in population size

Improved knowledge/more accurate data Use of different method

The change is mainly due to: Use of different method

6.17 Additional information

### 7. Habitat for the species

7.1 Sufficiency of area and quality of occupied habitat

a) Are area and quality of occupied habitat sufficient (for long-term survival)?

Yes

b) Is there a sufficiently large area of unoccupied habitat of suitable quality (for long-term survival)?

7.2 Sufficiency of area and quality of occupied habitat Method used

Based mainly on extrapolation from a limited amount of data

7.3 Short-term trend Period

2007-2018

7.4 Short-term trend Direction

Stable (0)

7.5 Short-term trend Method used

Based mainly on extrapolation from a limited amount of data

- 7.6 Long-term trend Period
- 7.7 Long-term trend Direction
- 7.8 Long-term trend Method used
- 7.9 Additional information

## 8. Main pressures and threats

#### 8.1 Characterisation of pressures/threats

Pressure	Ranking
Abiotic natural processes (e.g. erosion, silting up, drying out, submersion, salinization) (LO1)	М
Droughts and decreases in precipitation due to climate change (N02)	M
Threat	Ranking
Abiotic natural processes (e.g. erosion, silting up, drying out, submersion, salinization) (LO1)	М
Droughts and decreases in precipitation due to climate change (N02)	М

2019.11.26. 10:22:43 Page 4 of 6

8.2 Sources of information

8.3 Additional information

#### 9. Conservation measures

9.1 Status of measures

a) Are measures needed?

No

b) Indicate the status of measures

9.2 Main purpose of the measures

9.3 Location of the measures taken

9.4 Response to the measures

9.5 List of main conservation measures

9.6 Additional information

#### 10. Future prospects

10.1 Future prospects of parameters

a) Range Good

b) Population

Good

c) Habitat of the species Good

10.2 Additional information

#### 11. Conclusions

11.1. Range

Favourable (FV)

11.2. Population

Favourable (FV)

11.3. Habitat for the species

Favourable (FV)

11.4. Future prospects

Favourable (FV)

11.5 Overall assessment of

Favourable (FV)

Conservation Status

Stable (=)

11.6 Overall trend in Conservation Status

No change

11.7 Change and reasons for change in conservation status and conservation status trend

The change is mainly due to:

b) Overall trend in conservation status

a) Overall assessment of conservation status

No change

The change is mainly due to:

11.8 Additional information

2019.11.26. 10:22:43 Page 5 of 6

### 12. Natura 2000 (pSCIs, SCIs and SACs) coverage for Annex II species

12.1 Population size inside the pSCIs, SCIs and SACs network (on the biogeographical/marine level including all sites where the species is present)

a) Unit number of map 1x1 km grid cells (grids1x1)

- b) Minimum
- c) Maximum
- d) Best single value 2123

12.2 Type of estimate

12.3 Population size inside the network Method used

Best estimate

Based mainly on extrapolation from a limited amount of data

12.4 Short-term trend of population size within the network Direction

Stable (0)

12.5 Short-term trend of population size within the network Method used

Based mainly on extrapolation from a limited amount of data

12.6 Additional information

### 13. Complementary information

13.1 Justification of % thresholds for trends

13.2 Trans-boundary assessment

13.3 Other relevant Information
