Impact on population	The derogations are not detrimental.
Supervisory	Ad hoc control of the Ranger Service. Control of the Hunting Authority by

measure	checking of the hunting diary.
Comments	The monitoring of the migrant population started in 2010 and aims to follow the trends rather than the absolute population size due to the secretive behavior of the species. In order to get a hunting license hunters need to pass an exam where recognition of the game species is required. In the locations permitted in the derogation for <i>Scolopax rusticola</i> hunting no similar species occur regularly. Traditional hunting of <i>Scolopax rusticola</i> is exercised at dawn and dusk when roding behavior of the species is unique.

size	
Impact on population	The derogations are not detrimental.
Supervisory measure	The Duna-Dráva National Park must be informed three days before the start of the activities. A report/summary must be handed in until 10.04.2012. The licensee must provide opportunity for limitless, free-for-all control of the national park directorate's and the authority's personnel.
Comments	During the relocation, the licensee must co-operate with the electrical company. Artificial nest cannot be made, the original nest material must be used. The relocation can only be done until 10.03.2012, but if the birds return to their nest it must be stopped. If the birds start to make their nest on the original place they cannot be obstructed, stopped. The license (or a copy of it) must be kept at the place of the activities. The reporting commitment was fulfilled, the nest was successfully relocated.

Population size	Individuals: 43000; Breeding pairs: 21500; Others (unit): ; Others (number): 0
Impact on population	The derogations are not detrimental.
Supervisory measure	The Balaton-felvidéki National Park must be informed/consulted three days before the start of the activities. Incidental damage done (willfully or by accident) is the financial responsibility of the licensee, who must also provide the possibility for limitless, free-for-all control of the authority's and national park directorate's personnel. A short report/summary must be handed in until 15.02.2012.
Comments	The removal can only be done between 15.07.2012. and 15.01.2013. The license (or a copy of it) must be kept at the place of the activities. The reporting commitment was fulfilled, all six nests were removed. The nests were on six life threatening sycamore trees, which had to be cut down.

Population size	Individuals: 300000; Breeding pairs: 150000; Others (unit): ; Others (number): 0
Impact on population	The derogations are not detrimental.
Supervisory measure	The licensee must consult in advance with the Balaton-Uplands National Park Directorate, and a professional implementer must be chosen for the renewal work. The National Park as well as the authority must be informed three days before placing the scaffolding around the building, and beginning the work. A report must be handed in until 31.01.2012.
Comments	The license, or a copy of it must be kept at the place of the activities. The nests can only be removed after 01.09.2012. and until 28.02.2013 and only if birds, eggs or nestlings doesn't occupy them. Before the removal, the licensee must ensure that none of the birds stay in the nests. The implementer must reckon with the breeding period of the birds when placing the outer insulation around the building. No recovery work can be done without break (at least in every 2 hours) around the nests. After the removal (and finishing the recovery work) 20 artificial nests must be placed near the original ones.
