

speciesname *Odontopodisma rubripes* fajnév **vöröslábú hegyisáska**

melléklet **II** speciescode **4052**

2.2 Published sources and/or websites

Range

2.3.1 Surface range of the species in km2	660		
2.3.2 Date of range determination	2006		
2.3.3 Quality of data concerning range	Moderate e.g. based on partial data with som		
2.3.4 Range trend	Decreasing (-)		
2.3.5 Range trend magnitude in km2 (optional)			
2.3.6 Range trend period	2001-2006		
2.3.7 range-reasons	<table border="1"><tr><td>Direct human influence (restoration, deterioration, destruction)</td></tr><tr><td>Natural processes</td></tr></table>	Direct human influence (restoration, deterioration, destruction)	Natural processes
Direct human influence (restoration, deterioration, destruction)			
Natural processes			

and/or specify

Population

2.4.1 Population size estimation (minimum)	7		
2.4.1 Population size estimation (maximum)	10		
2.4.1 Population units	Number of localities		
2.4.2 Date of population estimation	2006		
2.4.3 Population-methods	<table border="1"><tr><td>Extrapolation from surveys of part of the population or from sampling</td></tr></table>	Extrapolation from surveys of part of the population or from sampling	
Extrapolation from surveys of part of the population or from sampling			
2.4.4 Quality of population data	Moderate e.g. based o		
2.4.5 Population trend	Decreasing (-)		
2.4.6 Population trend magnitude (km2)			
2.4.7 Population trend period	2001-2006		
2.4.8 Population-reasons	<table border="1"><tr><td>Direct human influence (restoration, deterioration, destruction)</td></tr><tr><td>Natural processes</td></tr></table>	Direct human influence (restoration, deterioration, destruction)	Natural processes
Direct human influence (restoration, deterioration, destruction)

Habitat

2.5.1 Habitats for the species

speciesname	<i>Odontopodisma rubripes</i>	fajnév	vöröslábú hegyisáska
melléklet	II	speciescode	4052
2.5.2 Area estimation (km2)	0		
2.5.3 Date of estimation	2006		
2.5.4 Quality of the data	Moderate e.g. based on partial data with s		
2.5.5 Trend of the habitat	Decreasing (-)		
2.5.6 Trend period	2001-2006		
2.5.7 Habitat-reasons	Direct human influence (restoration, deterioration, destruction)		
Other (specify)	Natural processes		

Reference values

2.6 Future prospects for the species	Poor prospects - species likely to struggle
2.7.1 Favourable reference range (km2)	660
Qualifier	More than
2.7.2 Favourable reference population	10
Qualifier	
2.7.3 Suitable habitat for the species	0

2.7.4 Other relevant information (optional)

A Kárpát-medence keleti felének szubbentemikus faja, hazánkban lokális előfordulású. Dús növényzetű (Rubus, Prunus spinosa), bozótos, elsősorban lápos, nedves élőhelyeken erőteljes, de helyileg igen korlátozott részpopulációi vannak, ezek igen sérülékenyek.

Röpképtelen, korlátozott mozgékonyiséggel rendelkező faj. Nagy egyedsűrűségű élőhelyein (pl. Bereg: Kaszonyi-hegy) az élőhelyek mozaikos struktúrája kedvező számára. Ahol pl. „vadgazdálkodási” céllal az erdőszegélyeken rendszeres cserjeirtás folyik (pl. Lónyai-erdő), ott az állománya csökken. Élőhelyein a vízlecsapolás, túlzott bozótirtás kerülendő. A cserjés-magaskórós erdőszegélyek megőrzendők.

Conclusions

Conclusions: (2.3) Range	Inadequate and deteriorating (U1-)
Conclusions: (2.4) Population	Inadequate and deteriorating (U1-)
Conclusions: (2.5) Habitat for the species	Inadequate and deteriorating (U1-)
Conclusions: (2.6) Future prospects	Inadequate and deteriorating (U1-)
Conclusions: Overall assessment	Inadequate and deteriorating (U1-)
