

Dolný vrch – Alsó-hegy 2016

REPORT

Ctirad Piskač

Luděk Vlk

This year we focused on few particulate tasks:

1. Exploration of Gyors zsomboly
2. Exploration of Nora-lyuk
3. Documentation and update of karstic objects at the plateau

Combined horizontal projection

232 NORA-LYUK

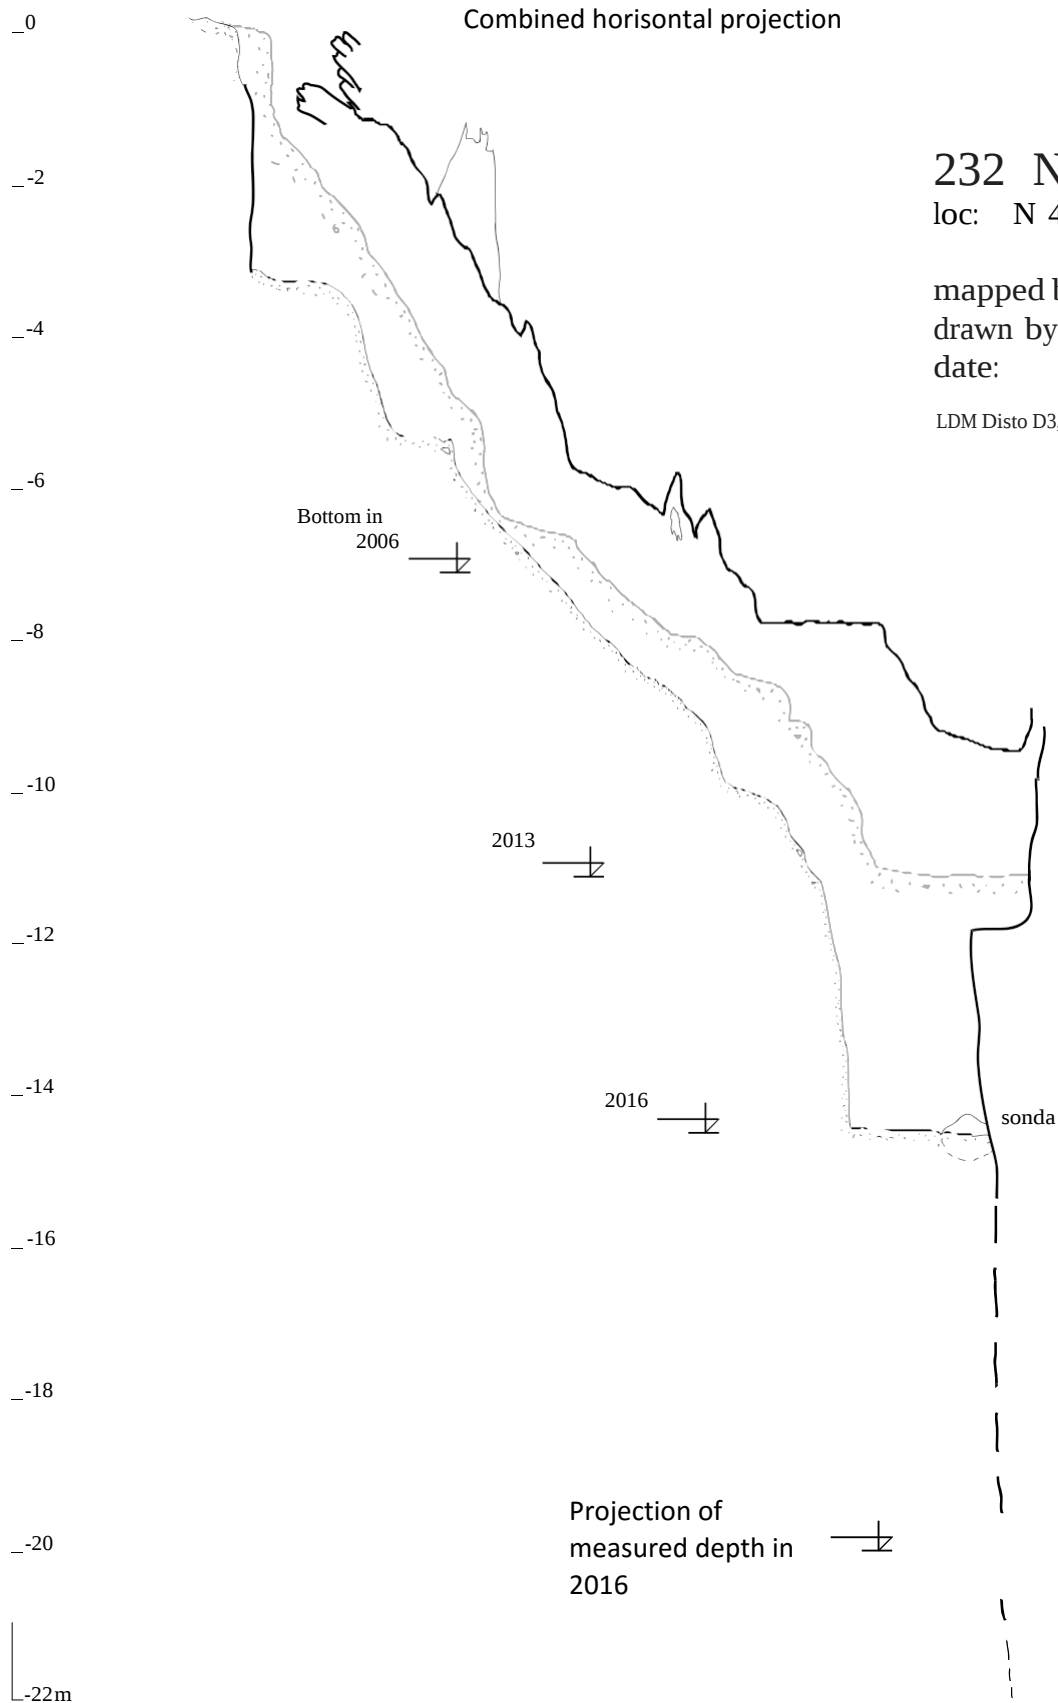

loc: N 48.56240°, E 20.68720°

5452/28 (179) Soltész zs.

loc: N 48.55942°, E 20.71272°

Rocky pothole is orientated to the doline in direction of 165°. There is a lot of vegetation around. During the exploration in 08/2016, we found out that the actual depth is approx. 9 meters – swamped roam. Former sources describe depth of 15 m. (<http://www.barlang.hu/pages/alsohegy/soltesz.htm>)

5452/87 Gyors zs.

The Gyors zomboly was explored at the bottom of the Entry shaft. We found two new chimenys: Stone pipe and Spring chimney.
