ADAPTATION TO CLIMATE CHANGE

- The Mission on Adaptation to Climate Change focuses on supporting EU regions, cities and local authorities in their efforts to build resilience against the impacts of climate change
- The Mission's objective is to accompany by 2030 at least 150 European regions and communities towards climate resilience
- On 17 April 2024, the Commission adopted an amendment to increase the 2024 budget of the missions by nearly €1.4 billion to a total of €7.3 billion
- The Mission contributes to putting the EU's adaptation strategy in practice by helping the regions to:
 - better understand the climate risks they are and will be confronted with in the future
 - develop their pathways to be better prepared and cope with the changing climate
 - test and deploy on the ground innovative solutions needed to build resilience

A SOIL DEAL FOR EUROPE

- The main goal of the Mission '**A Soil Deal for Europe**' is to establish 100 living labs and lighthouses to lead the transition towards healthy soils by 2030
- It is estimated that between 60 and 70% of EU soils are unhealthy
- The Mission will support the EU's ambition to lead on global commitments, notably the Sustainable Development Goals and contribute to the European Green Deal
- Targets on sustainable farming, climate resilience, biodiversity and zero-pollution. It is also a flagship initiative of the long term vision for rural areas
- Leads the transition towards healthy soils by funding an ambitious research and innovation programme with a strong social science component
- Putting in place an effective network of 100 living labs and lighthouses to co-create knowledge, test solutions and demonstrate their value in real-life conditions
