

REPORT ON THE 'MAIN RESULTS OF THE SURVEILLANCE UNDER ARTICLE 17' FOR ANNEX II, IV AND V SPECIES OF DIRECTIVE 92/43/EEC

NATIONAL LEVEL

1. GENERAL INFORMATION

| | |
|--|------------------------------|
| 1.1 Member State | HU |
| 1.2 Species code | 1898 |
| 1.3 Species scientific name | <i>Eleocharis carniolica</i> |
| 1.4 Alternative species scientific name (Optional) | |
| 1.5 Common name (Optional) | sűrű csetkása |

2. MAPS

Distribution of the species within the Member State concerned.

| | |
|---------------------------------------|---|
| 2.1 Sensitive species | No |
| 2.2 Year or period | 2019–2024 |
| 2.3 Distribution map | Yes |
| 2.4 Distribution map Method used | Based mainly on extrapolation from a limited amount of data |
| 2.5 Additional maps (Optional) | – |
| 2.6 Additional information (Optional) | – |

3. INFORMATION RELATED TO ANNEX V SPECIES (ART. 14 OF DIRECTIVE 92/43/EEC)

| | | |
|---|---|---|
| 3.1 Is the species taken in the wild/exploited? | No | |
| 3.2 Are measures needed for the species (only for species in favourable conservation status)? | No | |
| 3.3 Which of the measures in Art. 14 have been taken? | a) regulations regarding access to property | – |
| | b) temporary or local prohibition of the taking of specimens in the wild and exploitation | – |
| | c) regulation of the periods and/or methods of taking specimens | – |

| | | | | | | | |
|--|---|--|----------------|----------------|----------------|----------------|----------------|
| | d) application of hunting and fishing rules which take account of the conservation of such populations | – | | | | | |
| | e) establishment of a system of licences for taking specimens or of quotas | – | | | | | |
| | f) regulation of the purchase, sale, offering for sale, keeping for sale or transport for sale of specimens | – | | | | | |
| | g) breeding in captivity of animal species as well as artificial propagation of plant species | – | | | | | |
| | h) other measures, if yes, describe | – | | | | | |
| | | | | | | | |
| 3.4 Hunting bag or quantity taken in the wild regardless of conservation status - for Mammals and Acipenseridae (Fish) | a) Unit | – | | | | | |
| | b) Statistics/ quantity taken | <i>Provide statistics/quantity taken per hunting season or per year (where season is not used) over the reporting period</i> | | | | | |
| | | Season/ year 1 | Season/ year 2 | Season/ year 3 | Season/ year 4 | Season/ year 5 | Season/ year 6 |
| | Min. (raw, i.e. not rounded) | | | | | | |
| | Max. (raw, i.e. not rounded) | | | | | | |
| | Unknown | – | – | – | – | – | – |
| 3.5 Hunting bag or quantity taken in the wild Method used | – | | | | | | |
| 3.6 Additional information (Optional) | – | | | | | | |

BIOGEOGRAPHICAL LEVEL

Complete for each biogeographical region or marine region concerned.

4. BIOGEOGRAPHICAL AND MARINE REGIONS

| | |
|---|--|
| 4.1 Biogeographical or marine region where the species occurs | Pannonian |
| 4.2 First time reporting | No |
| 4.3 Additional information | – |
| 4.4 Sources of information | Monitoring reports (2019-2024) of Hungarian Biodiversity Monitoring System |

5. RANGE

Range within the biogeographical/marine region concerned.

| | |
|---|--|
| 5.1 Surface area (km ²) | 2126 |
| 5.2 Change and reason for change in surface area of range and main reason | Is there a change between reporting periods? no, there is no change |

| | | |
|---|--|---|
| | The change is mainly due to: | |
| 5.3 Short-term trend Period | 2013–2024 | |
| 5.4 Short-term trend Direction | stable | |
| 5.5 Short-term trend Magnitude (Optional) | a) Estimated Minimum | – |
| | b) Estimated Maximum | – |
| | c) Pre-defined range | – |
| | d) Unknown | – |
| 5.6. Short-term trend Magnitude Type of estimate (Optional) | – | |
| 5.7 Short-term trend Method used | Based mainly on extrapolation from a limited amount of data | |
| 5.8 Long-term trend Period (Optional) | – | |
| 5.9 Long-term trend Direction (Optional) | – | |
| 5.10 Long-term trend Magnitude (Optional) | a) Minimum | – |
| | b) Maximum | – |
| 5.11 Long-term trend Method used (Optional) | – | |
| 5.12 Favourable reference range | a) – | |
| | b) <i>if a precise favourable reference range is unknown indicate if the range is:</i> approximately equal to the favourable reference range (less than 2% smaller) | |
| | c) – | |
| | d) <i>Indicate method used to set reference value (multiple methods can be chosen)</i> | <i>Indicate the quality of information available:</i> |
| | Reference-based approach | Moderate |
| 5.13 Range when Directive came into force (Optional) | – | |
| 5.14 Additional information (Optional) | – | |

6. POPULATION

Population within the biogeographical/marine region concerned.

| | | |
|---|------------|---|
| 6.1 Year or period | 2019–2024 | |
| 6.2 Population size (in reporting unit) | a) Unit | – |
| | b) Minimum | – |

| | | |
|---|--|---------------------------------|
| | c) Maximum | – |
| | d) Best single value | – |
| | e) Class | |
| 6.3 Type of estimate | – | |
| 6.4 Quality of extrapolation to reporting unit (Optional) | – | |
| 6.5 Additional population size (using population unit other than reporting unit) (Optional) | a) Unit | number of map 1x1 km grid cells |
| | b) Minimum | 26 |
| | c) Maximum | 48 |
| | d) Best single value | – |
| 6.6 Type of estimate (Optional) | Best estimate | |
| 6.7 Population size Method used | Based mainly on extrapolation from a limited amount of data | |
| 6.8 Change and reason for change in population size and main reason | Is there a change between reporting periods? no, there is no change | |
| | The change is mainly due to: | |
| 6.9 Short-term trend Period | 2013–2024 | |
| 6.10 Short-term trend Direction | stable | |
| 6.11 Short-term trend Magnitude | a) Estimated Minimum | – |
| | b) Estimated Maximum | – |
| | c) Pre-defined range | – |
| | d) Unknown | – |
| 6.12 Short-term trend Magnitude Type of estimate | Best estimate | |
| 6.13 Short-term trend Method used | Based mainly on extrapolation from a limited amount of data | |
| 6.14 Long-term trend Period (Optional) | – | |
| 6.15 Long-term trend Direction (Optional) | – | |
| 6.16 Long-term trend Magnitude (Optional) | a) Minimum | – |
| | b) Maximum | – |
| | c) Confidence interval | – |

| | | |
|--|---|---|
| 6.17 Long-term trend Method used (Optional) | – | |
| 6.18 Favourable reference population | <i>a) Population size (with unit):</i> | |
| | <i>b) if a precise favourable reference population is unknown indicate if the population is:</i> approximately equal to the favourable reference population (less than 5% smaller) | |
| | <i>c) Indicate if favourable reference population is unknown:</i> – | |
| | <i>d) Indicate method used to set reference value (multiple methods can be chosen)</i> | <i>Indicate the quality of information available:</i> |
| | Reference-based approach | Moderate |
| 6.19 Population size when Directive came into force (Optional) | – | |
| 6.20 Additional Information (Optional) | <p>Due to methodological constraints, it is not possible to estimate the population size of <i>Eleocharis carniolica</i> in square meters (m²), as required by the reporting format of the European Commission. The primary reason for this limitation is that field data collected by researchers of the national park directorates in Hungary are not recorded in units of square meters. Instead, the surveys are conducted using presence-absence and occurrence-based methods within broader spatial frameworks. Furthermore, the available data on the species' density are either lacking or highly variable, making it scientifically unreliable to extrapolate population size retrospectively in m². Any attempt to convert these observations into m² units would result in a high degree of uncertainty and would not accurately reflect the species' real population size or distribution. Therefore, for <i>Eleocharis carniolica</i>, we have opted to report the population size based on the number of occupied 1x1 km UTM grid cells, like in 2019. This spatial unit aligns with the structure of our existing monitoring data and provides a consistent, repeatable, and interpretable basis for population assessment. We respectfully submit this approach as the most scientifically sound and transparent method available for reporting on this species under Article 17.</p> | |

7. HABITAT FOR THE SPECIES

| | |
|---|---|
| 7.1 Sufficiency of area and quality of occupied habitat | <i>a) Is area of occupied habitat sufficient (for long-term survival)?</i> Unknown |
| | <i>b) Is quality of occupied habitat sufficient (for long-term survival)?</i> No |
| | <i>c) If NO to a) is there a sufficiently large area of unoccupied habitat of suitable quality (for long-term survival)?</i> – |
| | – |

| | | |
|--|---|--|
| 7.2 Sufficiency of area and quality of occupied habitat Method used | Area of habitat: Based mainly on extrapolation from a limited amount of data | Quality of habitat: Based mainly on extrapolation from a limited amount of data |
| 7.3 Short-term trend Period | 2013–2024 | |
| 7.4 Short-term trend Direction | stable | |
| 7.5 Short-term trend Method used | Based mainly on extrapolation from a limited amount of data | |
| 7.6 Long-term trend Period (Optional) | – | |
| 7.7 Long-term trend Direction (Optional) | – | |
| 7.8 Long-term trend Method used (Optional) | – | |
| 7.9 Additional information (Optional) | – | |

8. MAIN PRESSURES AND THREATS

8.1 Characterisation of pressures

| Pressure | Timing | Scope (proportion of population affected) | Influence (on population or habitat of the species) | Invasive alien species of Union concern | Other invasive alien species |
|--|--|---|---|---|---|
| PJ03 Climate change - Changes in precipitation regimes | ongoing and likely to be in the future | whole >90% | High influence | | |
| PL02 Water regimes - Drainage | ongoing and likely to be in the future | majority 50 – 90% | Medium influence | | |
| PL01 Water regimes - Abstraction from groundwater, surface water or mixed water | ongoing and likely to be in the future | majority 50 – 90% | Medium influence | | |
| PI02 Problematic species - Other invasive alien species (other than species of Union concern) | ongoing and likely to be in the future | minority <50% | Medium influence | | <i>Bidens frondosa</i> <i>Acer negundo</i> |
| PF13 Infrastructure - Drainage, land reclamation and conversion of wetlands, marshes, bogs, etc. for built-up areas | only in future | – | – | | |
| PM02 Natural - Flooding | only in future | – | – | | |

| | | | | | |
|---|--|------------|------------------|--|--|
| PM07 Natural - Natural processes without direct or indirect influence from human activities or climate change | ongoing and likely to be in the future | whole >90% | Medium influence | | |
| 8.2 Methods used (Optional) | – | | | | |
| 8.3 Sources of information (Optional) | – | | | | |
| 8.4 Additional information (Optional) | – | | | | |

9. CONSERVATION MEASURES

| | | | | | |
|---|---|--|--|--|--|
| 9.1 Status of measures | <p>Are measures needed?</p> <p>Yes</p> <p>Status of measures:</p> <p>Measures identified, but none yet taken</p> | | | | |
| 9.2 Scope of measures taken | – | | | | |
| 9.3 Main purpose of the measures taken | – | | | | |
| | – | | | | |
| 9.4 Location of the measures taken | – | | | | |
| 9.5 Response to the measures <i>(when the measures start to neutralize the pressure(s) and produce positive effects)</i> | – | | | | |
| 9.6 List of main conservation measures | <p>MJ02 – Implement climate change adaptation measures</p> <p>MM01 – Management of habitats (others than agriculture and forest) to slow, stop or reverse natural processes that occur without direct or indirect influence from human activities or climate change</p> <p>MI03 – Management, control or eradication of other invasive alien species</p> <p>MF08 – Manage changes in hydrological and coastal systems and regimes for construction and development (incl. restoration of habitats).</p> <p>MM02 – Minimise/prevent impacts of geological and natural catastrophes</p> | | | | |
| 9.7 Additional information (Optional) | – | | | | |

10. FUTURE PROSPECTS

| | | |
|-------------------------------------|---------------|---------|
| 10.1 Future prospects of parameters | a) Range | Unknown |
| | b) Population | Unknown |

| | | |
|--|---------------------------|---------|
| | c) Habitat of the species | Unknown |
| 10.2 Additional information (Optional) | – | |

11. CONCLUSIONS

Assessment of conservation status at end of reporting period

| | | |
|---|---|---|
| 11.1 Range | Favourable (FV) | |
| 11.2 Population | Favourable (FV) | |
| 11.3 Habitat for the species | Inadequate (U1) | |
| 11.4 Future prospects | Unknown (XX) | |
| 11.5 Overall assessment of Conservation Status | Inadequate (U1) | |
| 11.6 Overall trend in Conservation Status | stable | |
| 11.7 Change and reasons for change in conservation status and conservation status trend | Overall assessment of conservation status (11.5) | |
| | <i>Indicate whether there is a change from the previous reporting round and (if yes) the nature of that change.</i> | yes, due to the use of different method (including taxonomical change or use of different thresholds) |
| | <i>The change is mainly due to:</i> | the use of a different method |
| | Overall trend in conservation status (11.6) | |
| | <i>Indicate whether there is a change from the previous reporting round and (if yes) the nature of that change.</i> | no, there is no difference |
| | <i>The change is mainly due to:</i> | |
| 11.8 Additional information (Optional) | – | |

12. NATURA 2000 (PROPOSED SITES OF COMMUNITY IMPORTANCE (PSCIs), SITES OF COMMUNITY IMPORTANCE (SCIs) AND SPECIAL AREAS OF CONSERVATION (SACs) COVERAGE FOR ANNEX II SPECIES OF DIRECTIVE 92/43/EEC

| | | |
|---|------------|---|
| 12.1 Population size inside the pSCIs, SCIs and SACs network (on the biogeographical/marine level including all sites | a) Unit | – |
| | b) Minimum | – |
| | c) Maximum | – |

| | | |
|---|---|---------------------------------|
| where the species is present) | d) Best single value | – |
| 12.2 Type of estimate | – | |
| 12.3 Additional population size (using population unit other than reporting unit in field 6.2) (Optional) | a) Unit | number of map 1x1 km grid cells |
| | b) Minimum | 26 |
| | c) Maximum | 48 |
| | d) Best single value | – |
| 12.4 Type of estimate (Optional) | Best estimate | |
| 12.5 Population size inside the network Method used | Based mainly on extrapolation from a limited amount of data | |
| 12.6 Short-term trend of population size within the network Direction | stable | |
| 12.7 Short-term trend of population size within the network Method used | Complete survey or a statistically robust estimate | |
| 12.8 Short-term trend of habitat for the species within the network Direction | stable | |
| 12.9 Short-term trend of habitat for the species within the network Method used | Based mainly on extrapolation from a limited amount of data | |
| 12.10 Additional information (Optional) | – | |

13. COMPLEMENTARY INFORMATION

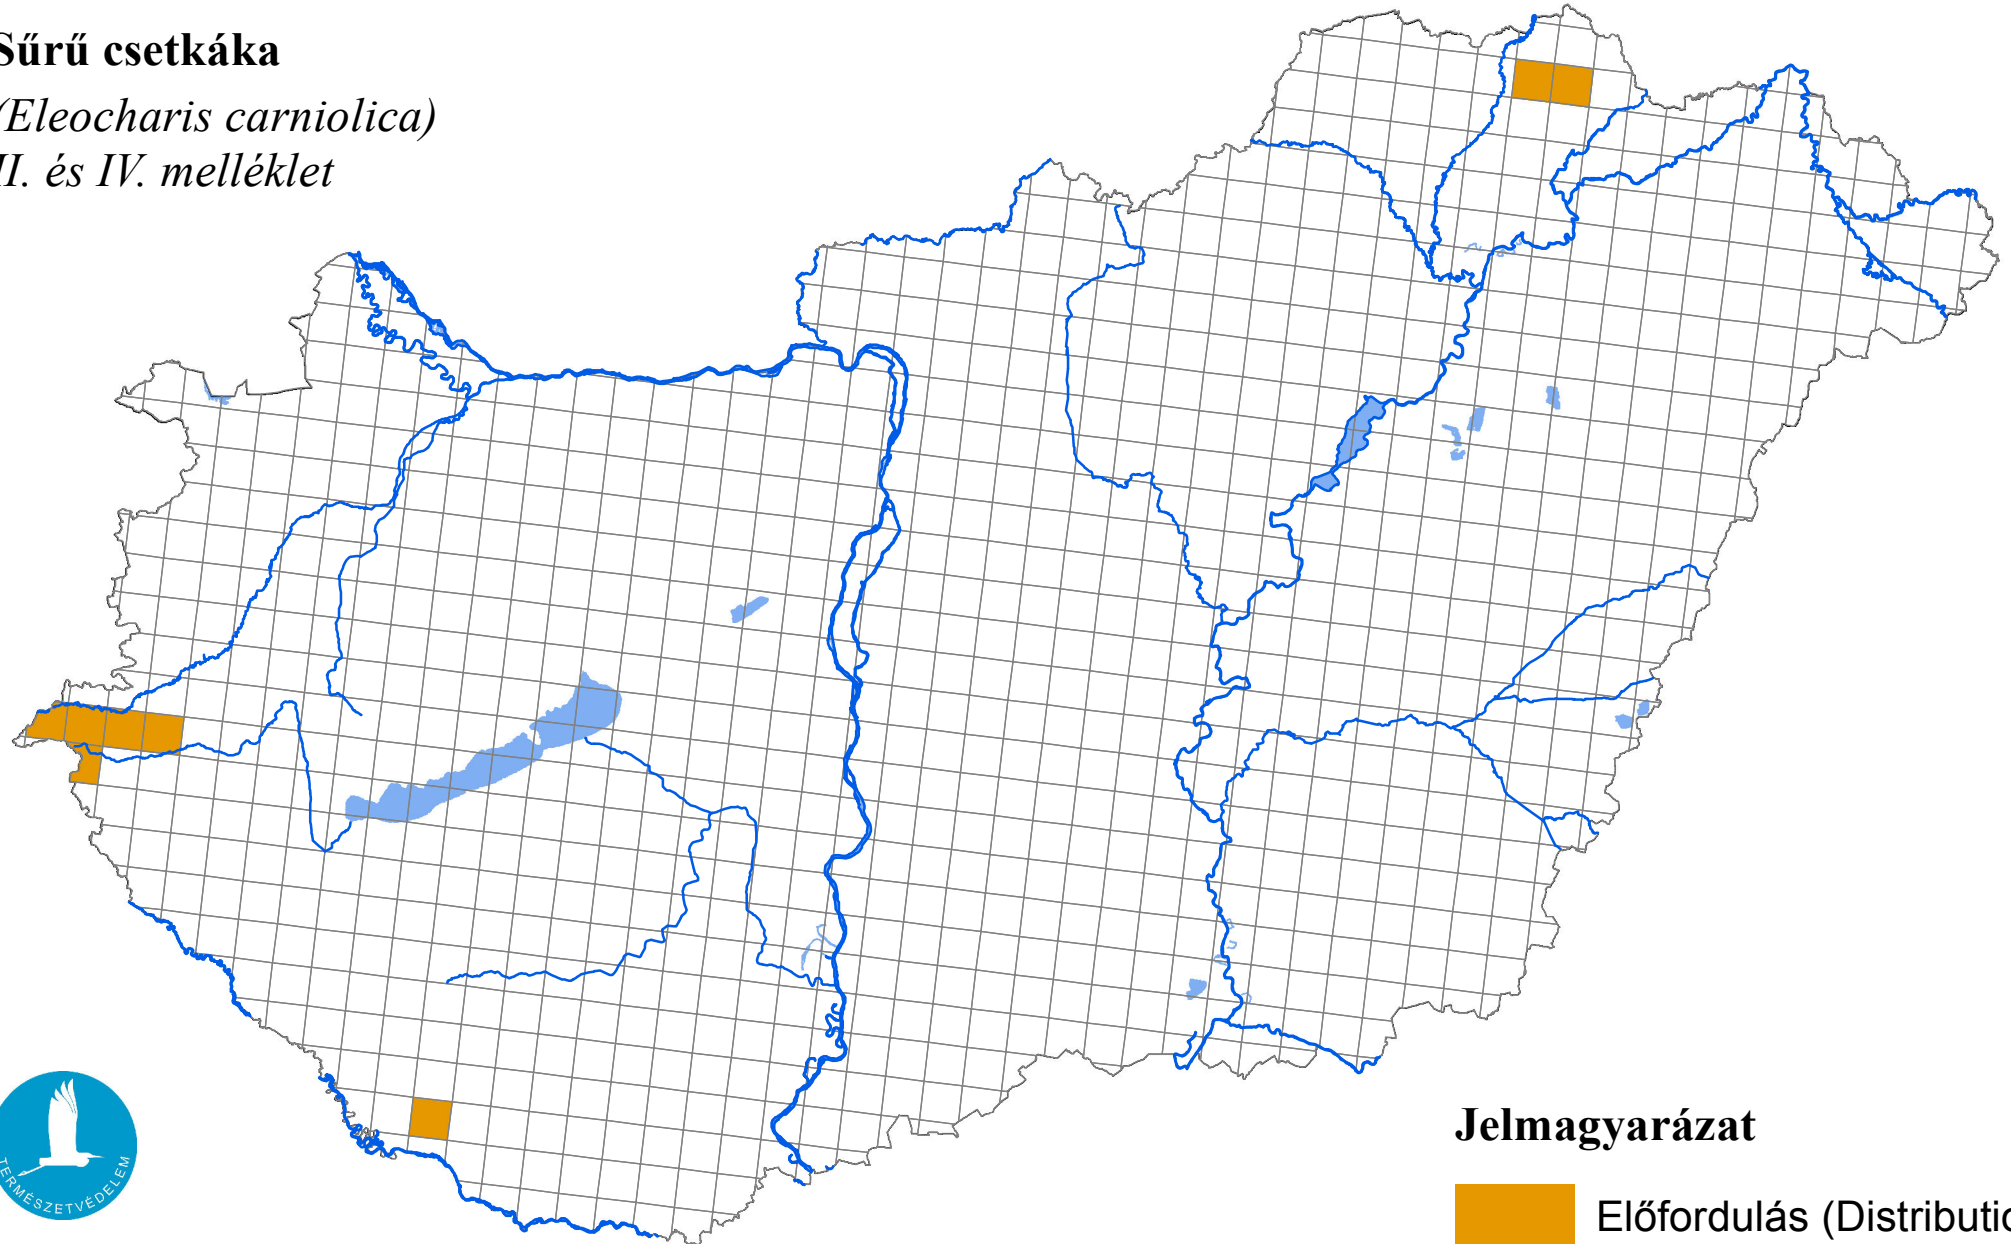

| | | |
|---|---|--|
| 13.1 Justification of % thresholds for trends | – | |
| 13.2 Trans-boundary assessment | – | |
| 13.3 Other relevant information | – | |

Az élőhelyvédelmi irányelv 17. cikke szerinti országjelentés, 2025

Sűrű csetkása

(*Eleocharis carniolica*)
